

Assignment 1 A, Website Development 1

Personal details

Name: Serhii Rozvorovych

Student Number: 20118343

Course: Computer Forensics & Security (SE602)

Group: W1

Brief overview

- The website consists of **five interconnected pages**:
 - **Home page (main.html)** – introduces me with a header, navigation bar, portrait image, and links to other sections.
 - **About me page (about.html)** – describes my background, work, studies, hobbies, and personal story.
 - **Hobbies page (hobbie.html)** – presents my interests, includes a Spotify-style *Now Playing* section with an audio player, a video in the gallery, and a table of favourites.
 - **Contact page (contact.html)** – provides my phone number, personal and university emails as clickable links.
 - **Support page (index.html in “support the creator” folder)** – displays my IBAN number for those who wish to support me.
 - Each page includes a **header**, **main section**, and **footer**, ensuring a consistent structure throughout the site.
 - A **navigation bar** connects all pages using relative internal links.
 - The **Hobbies** page showcases multimedia integration with <audio> and <video> elements, and a data table.
 - Each image contains an **alt attribute** for accessibility, and a **“Skip to content”** link allows easier navigation with a keyboard.
 - All styling was done using **external CSS files** for maintainability and a uniform visual identity.
 - The website was built entirely with **HTML and CSS**, without any JavaScript.
-

Visual Design

The website uses two consistent visual themes:

- a **light brown tone** for the Home and Contact pages, creating a warm and inviting feel;
- a **neon purple theme** for the About, Hobbies, and Support pages, giving a modern and creative look.

Both color schemes maintain good contrast for readability.

Consistent typography, spacing, and layout are used across the site to maintain visual harmony.

Each page highlights its unique content while keeping the same navigation style and footer to tie the site together as one cohesive design.
